

## **SOUTH HAYWARD**

**PLANNING** During 2001, the City of Hayward revised its redevelopment plans to link the Downtown, Hayward BART and South Hayward BART station areas via major transportation corridors. This amended redevelopment plan directs compact mixed-use, transit-oriented development and establishes pedestrian improvements, housing goals and job creation goals. The City's updated General Plan identifies the South Hayward BART Station as a critical center for new employment-oriented development and improved access to transit.

BART is also supporting efforts towards completion of a South Hayward/Cherryland-Ashland transportation planning process to further identify community needs and solutions. This plan will be complete in late Spring 2004.

**ACCESS IMPROVEMENTS** Fifteen new bike racks were recently installed. This station will have new, ADA-compliant platform edge tiles installed, pending the receipt of grant funds.

**REINVESTMENT** This station had new, energy efficient lighting fixtures and lamps installed throughout the station parking lot in 2003, is scheduled to have the station canopy re-roofed in 2004, and have energy efficient lighting fixtures and lamps installed throughout the station itself in 2004. In 2005, this station is scheduled to have the parking lot re-paved. These projects are all part of ongoing station renovation program activities.
